## PROFILE

- Versatile and results-driven **Full-Stack Developer** with **2+ years** of professional experience in **software development**, currently working as a **MERN Stack Developer** at **SNM Techcraft Innovation**. Adept at building scalable, high-performance web applications using **React.js**, **Node.js**, **Express.js**, and **MongoDB**, with additional hands-on experience in **MySQL**, **PHP**, and legacy systems. Demonstrates strong proficiency in **frontend development**, RESTful API integration, and performance optimization. Known for a collaborative mindset, problem-solving capabilities, and a commitment to writing clean, maintainable code. Eager to grow expertise in modern JavaScript frameworks, cloud technologies, and contribute to impactful, forward-thinking development teams.

## SKILLS

- Frontend:** React.js, React Native, HTML5, CSS3, JavaScript (ES6+), Tailwind CSS
- Backend:** Node.js, Express.js, PHP
- Database:** MongoDB, MySQL
- Tools & Frameworks:** Git, Vite, React Router, RESTful APIs
- Other Technologies:** Unity 3D, Figma, C#.
- Soft Skills:** Problem Solving, Time Management, Teamwork, Attention to details, Creativity

## EXPERIENCE

### MERN Stack Developer

#### SNM TechCraft Innovation — January 2025 – Present

- Gained strong expertise in **React**, **React Native**, and **API integration** for seamless frontend-backend communication.
- Developed high-performance, scalable, and responsive applications across web and mobile platforms.
- Collaborated closely with cross-functional teams to enhance UI/UX, optimize performance, and ensure maintainability.
- Continuously expanding knowledge in modern JavaScript frameworks and full-stack development practices.

### Software Developer (Internship & Full-time)

#### Ciencias in VR — July 2023 — December 2024

- Developed and maintained dynamic web applications using PHP, focusing on backend logic and database management.
- Optimized database structure, resulting in 20% faster data retrieval.
- Designed and implemented dynamic forms with real-time validation, improving user interactions and data accuracy.
- Implemented pagination for data-heavy applications, enhancing load times and navigation.
- Transitioned towards MERN stack technologies (MongoDB, Express.js, React.js, Node.js), focusing on modern web development.

## EDUCATION

- Bachelor of Computer Application (**BCA**)  
Gujarat University, 2024
- Higher Secondary Certificate (**HSC**)  
Diwan Ballu Paladi
- Secondary School Certificate (**SSC**)  
Diwan Ballu Paladi

## PROJECTS

- Real Estate App** – A full-featured **MERN stack** real estate platform enabling property listings, filtering, map integration, and user authentication. Designed with responsive UI for mobile and desktop users.
- AngreGrammar** – A learning platform focused on grammar education, with interactive lessons, quizzes, and progress tracking built using React.js and backend API integration.
- Inquiry Management System (Nico)** – A robust tool for tracking and managing user inquiries. Built with MERN stack, featuring inquiry submission, status tracking, admin dashboard, and user notifications for efficient lead handling.
- MyChat App** - Real-time MERN chat app with live updates, conversation management, and responsive design, handling 100+ active users.
- Gmail Clone** - MERN-based email app supporting sending, receiving, and real-time updates, improving workflow by 25%.
- Job Portal App (Ongoing)** - Developing a job portal using React Native & React.js at SNM TechCraft Innovation, featuring job listings, applications, authentication, and API integration for a seamless experience.
