PROFILE

- Versatile and results-driven **Full-Stack Developer** with **2+ years** of professional experience in **software development**, currently working as a **MERN Stack Developer** at **SNM Techcraft Innovation**. Adept at building scalable, high-performance web applications using **React.js**, **Node.js**, **Express.js**, and **MongoDB**, with additional hands-on experience in **MySQL**, **PHP**, and legacy systems. Demonstrates strong proficiency in **frontend development**, RESTful API integration, and performance optimization. Known for a collaborative mindset, problem-solving capabilities, and a commitment to writing clean, maintainable code. Eager to grow expertise in modern JavaScript frameworks, cloud technologies, and contribute to impactful, forward-thinking development teams.

SKILLS

- **Frontend:** React.js, React Native, HTML5, CSS3, JavaScript (ES6+), Tailwind CSS
- **Backend:** Node.js, Express.js, PHP
- **Database:** MongoDB, MySQL
- **Tools & Frameworks:** Git, Vite, React Router, RESTful APIs
- **Soft Skills:** Problem Solving, Time Management, Teamwork, Attention to details, Creativity

EXPERIENCE

MERN Stack Developer

SNM TechCraft Innovation — January 2025 – Present

- Gained strong expertise in **React**, **React Native**, and **API integration** for seamless frontend-backend communication.
- Developed high-performance, scalable, and responsive applications across web and mobile platforms.
- Collaborated closely with cross-functional teams to enhance UI/UX, optimize performance, and ensure maintainability.
- Continuously expanding knowledge in modern JavaScript frameworks and full-stack development practices.

Software Developer (Internship & Full-time)

Ciencias in VR — July 2023 — December 2024

- Developed and maintained dynamic web applications using PHP, focusing on backend logic and database management.
- Optimized database structure, resulting in 20% faster data retrieval.
- Designed and implemented dynamic forms with real-time validation, improving user interactions and data accuracy.
- Implemented pagination for data-heavy applications, enhancing load times and navigation.
- Transitioned towards MERN stack technologies (MongoDB, Express.js, React.js, Node.js), focusing on modern web development.

EDUCATION

Masters of Computer Application (MCA)

Paul University.

August, 2025 - Present

Bachelor of Computer Application (BCA)

Gujarat University.

July, 2021 - May, 2024

CERTIFICATIONS

- **Deloitte Australia Technology Job Simulation on Forage - June :**
 - Completed a job simulation involving development and coding.
 - Wrote a proposal for creating a dashboard.
- **AI Workshop** – Be10X (Focused on AI applications in software development)
- **MERN Stack Certified Course** – 30 Days Coding (Covering MongoDB, Express.js, React, and Node.js)

PROJECTS

- **Bus Tracking System (Ongoing)** – A real-time tracking app built with React Native and Firebase. Shows live bus location, estimated arrival times, and route details for drivers and passengers.
- **Real Estate App** – A full-stack MERN application for listing and browsing properties. Features include advanced filtering, user authentication, and a responsive UI.
- **AngrejiGrammar** – A grammar learning app built using React.js and Firebase. Offers Gujarati explanations, audio-supported lessons, quizzes, and progress tracking for effective learning.
- **Inquiry Management System (Nico)** – Java, React and React native based dashboard for managing user inquiries. Includes inquiry forms, status tracking, admin controls, and automatic notifications to improve lead handling.
- **MyChat App** – A real-time chat application using the MERN stack. Supports live messaging, active user tracking, and is optimized for over 100 users with responsive design..
- **Gmail Clone** – A MERN-based email system simulating core Gmail features. Includes real-time inbox updates, compose/send functionality, and structured email threading.
